

Keep your business moving with a fully integrated platform

Seamless, simplified and secure: your all-in-one payment solution from consultation to project completion.

Cyncly Payments is our fully embedded payment platform that offers a comprehensive and easy way for you to process payments, run reports and manage day-to-day activities — all within RFMS. Workflows between departments such as inventory, accounting and sales are automated and simplified which eliminates manual entry, saving you time, cutting administration costs and reducing error.

Do more with your business today with Cyncly Payments.

Setting up is easy

- **1 Complete a form requesting more information**
- **2 Cyncly contacts you with more information**
- **3 Complete a merchant application**
- **4 Cyncly schedules training and implementation**

Frequently asked questions

How does processing payments with Cyncly work with RFMS software?

Processing payments through your RFMS software is easy and convenient. We offer an embedded solution that allows you to view reports and detailed payment data, manage notifications and fraud settings directly from RFMS.

How secure is processing payments with Cyncly?

Our solution is PCI compliant and designed with your security and privacy in mind, making it a simple and secure way to pay. Transactions are point-to-point encrypted so card data is never exposed.

What are the contract terms for processing payments with Cyncly?

We offer a month-to-month agreement with no early termination fee. It's that simple.

Is Cyncly support for payments outsourced to a third-party company?

No, Cyncly offers in-house customer service. This means you have one point of contact for RFMS software related questions and payments support.
