Frequently asked questions

How does processing payments with Cyncly work with Design Flex software?

Processing payments through your Design Flex software is easy and convenient. We offer an embedded solution that allows you to view reports and detailed payment data, manage notifications and fraud settings directly from Design Flex.

How secure is processing payments with Cyncly?

Our solution is PCI compliant and designed with your security and privacy in mind, making it a simple and secure way to pay. Transactions are point-to-point encrypted so card data is never exposed.

What are the contract terms for processing payments with Cyncly?

We offer a month-to-month agreement with no early termination fee. It's that simple.

Is Cyncly support for payments outsourced to a third-party company?

No, Cyncly offers in-house customer service. This means you have one point of contact for Design Flex software related questions and payments support.
